

a A morphology-defined branch

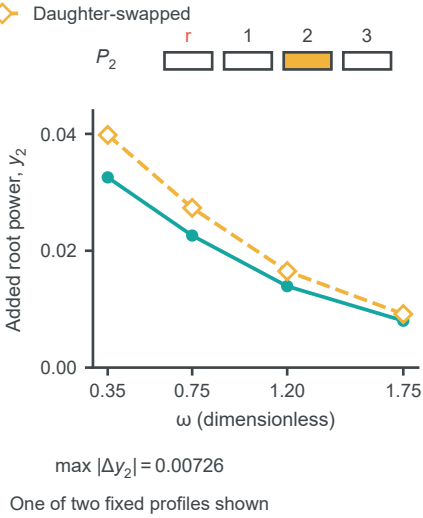

E5 · known labelled tree
Daughter exchange: 2 ↔ 3
 $J' = \Pi J \Pi^T$; C held fixed
 $L' = -C^{-1/2} J C^{-1/2}$

b Identical coherent responses

c A fixed profile separates the aliases

d Information and numerical reconstruction

Routine	Inverse-length edges	Constant edges
Known-tree fit · relative L error	2.95×10^{-14}	4.78×10^{-14}
Exact finite-frequency routine	Precision refusal	Precision refusal

e Sensitivity to profile imperfections

20 seeds/setting; × nonconverged (19/20 at one repeat)
